Response to Amendment

The amendment to the claims and specification filed on February 6, 2004 have been entered into the record.

Allowable Subject Matter

Claims 1-5 are allowed. The following is an examiner's statement of reasons for allowance: Independent claims 1,4 and 5 have the limitation of setting a velocity of opening a cassette door based upon a pressure differential. The closest prior art of Bacchi et al. does not teach or suggest setting such a parameter. .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

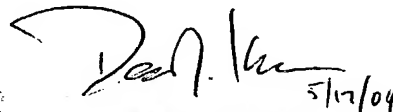

Applicant's arguments filed February 6, 2004, with respect to claims 1-4 have been fully considered and are persuasive. The rejections of claims 1-4 have been withdrawn. After review of applicant argument and the article written by the inventors of the instant invention it is clear that one of ordinary skill in the art would have had to perform undue experimentation to arrive at the limitation of setting the opening velocity pressure ratio at .06 (m/s) Pa.
